

Robotics Camp

New Horizon will be offering a Robotics camp this summer which will also be targeting social skill development. The camps will focus on building interest in science, technology, engineering, and math (STEM) through real-world challenges to be solved by research, critical thinking and imagination. Along with playful STEM experiences, the camp will focus on teaching social skills which will allow social skill development within the groups. Each week a social skill will be taught and practiced to improve communication between participants.

Social Skills taught may include:

- ✓ Recognizing/understanding others' point of view
 - ✓ Social problem solving
 - ✓ Peer negotiation
 - ✓ Conflict management
 - ✓ Active listening
 - ✓ Peer resistance skills
 - ✓ Effective communication
- Increased acceptance and tolerance of peers within groups

Camps will be offered for Ages 4-6, 6-10 and 9-16.

Camp will be offered by New Horizon Therapy. For more information on groups, contact Armida Carr, MS, CCC-SLP at 480-508-7566 or email at arcarr@newhorizontherapyaz.com
